

Offline POS + WhatsApp Storefront — MVP Roadmap

Project Goal

Build an offline-first POS and WhatsApp storefront SaaS for small businesses operating in unstable internet environments.

Core MVP Features

- Authentication (Owner & Cashier roles)
- POS with offline sales support
- Inventory management
- Customer debt tracking
- Order history
- Public storefront pages
- WhatsApp ordering
- Offline sync engine

Recommended Stack

Backend: Laravel 12, MySQL, Redis, Sanctum

Frontend: Vue 3, Pinia, TailwindCSS

Desktop: Tauri + SQLite

Deployment: Hetzner or Contabo VPS

Phase 1 — Backend Foundation (Week 1)

- Setup Laravel API-first architecture
- Authentication & roles
- Multi-store structure
- Create core database schema
- Product, sales, customer APIs

Phase 2 — POS Frontend (Week 2)

- Fast product search
- Barcode support
- Cart & checkout flow
- Receipt preview & printing
- Keyboard shortcuts
- Touchscreen-friendly interface

Phase 3 — Offline Sync Engine (Week 3)

- SQLite local storage
- Local transaction queue
- Retry sync logic
- Conflict resolution
- Sync logs & status indicators

Phase 4 — Inventory Management (Week 4)

- Product CRUD
- Categories
- Barcode generation
- Stock adjustments
- Inventory history logs

Phase 5 — WhatsApp Storefront (Week 5)

- Public storefront URLs
- Mobile-friendly product catalog
- WhatsApp order generation
- Shareable order links

Phase 6 — Reporting (Week 6)

- Daily/monthly sales reports
- Inventory reports
- Profit estimates
- Revenue dashboard

Phase 7 — SaaS Preparation (Week 7)

- Tenant isolation
- Subscription-ready architecture
- Billing placeholders
- Feature flags

Phase 8 — Stabilization & Polish (Week 8)

- Improve UI consistency
- Sync reliability testing
- Better error handling
- Backup/export features

Revenue Strategy

- Early beta free for first stores
- Basic Plan: \$10/month
- Pro Plan: \$25/month

Future Features

- Multi-store support
- Accounting
- QR payments
- AI forecasting
- Loyalty system
- Cloud backups

Success Metrics

- Reliable offline sales
- Accurate inventory syncing
- Easy cashier workflow
- Fast WhatsApp ordering

8-Week MVP Timeline

Week	Focus
1	Backend Foundation
2	POS Frontend
3	Offline Sync Engine
4	Inventory Management
5	WhatsApp Storefront
6	Reporting
7	SaaS Preparation
8	Polish & Stabilization
